Less Than Minimum Quantity

Call factory for quote.

Co-op Program

Please call factory for price information. All co-ops must be factory authorized to insure proper billing. Co-ops must be established and verified before first order is submitted. Purchase order must indicate co-op program and co-op quote number when submitted. If not, standard catalog charge will apply. Coupons or discounts cannot be applied to co-op orders. Co-ops not to exceed maximum catalog quantities.

ART REQUIREMENTS

Please submit original art files to: art@themagnetgroup.com. If revised art is sent, it is the customer's responsibility to advise customer service of the new art. *Changes to previously sent art must be sent to Customer Service to ensure use of new art.*

We accept electronic artwork on CD, DVD and e-mail (file size permitting). We have an FTP site available, please call for log-in details.

- Be sure to send all linked files, including all TIFF and EPS files for artwork placed in your document even if previously embedded, as well as all printer and screen fonts used.
- Send only original, native vector files.
- All RGB defined colors and files must be converted to CMYK for four-color process production.
- Convert fonts to outlines or paths.

We support the following software for Macintosh:

- Adobe Illustrator
- Adobe Photoshop
- Adobe Acrobat
- QuarkXPress
- Adobe InDesign
- Adobe PageMaker

Acceptable File Types:

- Vector (preferred)
- TIFF (minimum 300 dpi resolution)
- EPS (minimum 300 dpi resolution)
- JPEG (minimum 300 dpi resolution)
- PDF (Press Quality)
- ZIP (compression file)
- Stuffit (compression file)

Microsoft electronic files generally are not acceptable as output for print production. However, black-and-white files can be output from a high-quality laser printer and then used as camera-ready artwork.

Camera-Ready Artwork

Camera-ready art is artwork that can be scanned without further preparation or changes. Halftones (screens) will not photograph well and should be avoided. We will accept camera-ready artwork that is already separated or that includes black line work (or key lines) to separate each color. "Camera-ready" art should be clean, black, and crisp on a smooth white background that requires little or no touch-up. (Original art or PMT 's are best.) Artwork must be submitted 1/4 of the finished printed size (for large prints) or large enough to fit on 8.5" x 11" page size. Please avoid submitting artwork that must be enlarged more than 400%. If appropriate quality or size specifications are not met, an art charge will apply. This will be determined once artwork is received.

The Following Artwork is Not Camera-Ready:

Drawings, letterhead, photocopies, business cards, faxes, and low resolution laser printed artwork that is not 1200 dpi are not considered camera ready artwork. (Recommendation: Black and white 1200 dpi laser prints at 200% larger than actual size to be imprinted).

Hard Copies

Hard copies are not required on every order; however on the hard copies we receive Magnet LLC™ will review but will not proof against electronic art sent. Magnet LLC™ offers several types of proofs that can be done if needed (additional charges may apply).

Art Charges

If art requirements are not met, art time will be billed at **\$40.00 (X) per hour**. Factory WILL NOT be responsible for charges due to "clean-up" or "rework" deemed necessary to meet production standards.

Photo Scans

\$30.00 (C) per scan up to 8.5" x 11" size. For larger photos and transparencies/slides, call for quote.

Typesetting

We will typeset up to 3 lines for FREE. All other typesetting (including copy changes, postcard copy, curved copy, schedules, and word magnets) will be billed as needed **\$40.00 (X) per hour**. The typeset style must be indicated, or it will be left to the discretion of the typesetter. Charges less than \$40.00 will be processed without notification.

Type Size

- Minimum type size: 6 point.
- Small registers/trademarks with fine lines may appear as a dot on product.

Serif Fonts

- Please avoid using fine serif fonts. These fonts are usually too thin and fill in or lose detail in the printing process.
- Avoid using serif fonts in four color reverse copy areas.

Line Thickness

- Minimum line thickness: .5 point.
- 1 point minimum line thickness for reverse copy or art.

Bleed

Bleed (art intended to print to the edge) must extend 3/32" outside cut line. Art not intended to print to the edge must remain 3/32" inside cut line.

Imprint Area/Live Copy

Due to variances in cut, all copy must remain 3/32" inside cut lines.

Halftones

Halftones are made up of dots and are not recommended for type.

- **Digital art:** Halftones must be between a 5% to 90% screen.
- **Silk Screen art:** Halftone must be between a 30% to 70% screen. Avoid graduated halftones.
- **Offset art:** Gradient halftone range 2% to 100%. Screen tint range 10% to 90%.

Colors

- All RGB colors must be converted to CMYK for four-color process production.
- Metallic and fluorescent colors are not available on digital art.

Additional Art Requirements

- **Silk Screen**
 - Butt register not recommended. Please call for assistance.
 - **Trapping:** 1 point minimum. If art is too fine we will overprint. Trapping may cause a color change where colors meet.
 - **Overprinting:** We use UV inks, which are somewhat transparent. When overprinting 1 color on top of another the appearance of colors may change. Keep this in mind when creating fine details. Black, however, will cover everything.

Helpful Hints

- EPS (Encapsulated PostScript) file format is used to transfer PostScript image information from one program to another. The file includes PostScript code plus a low-resolution representation of the image. Logos, illustrations and graphics that will be color separated should be saved as EPS files.
- TIFF (Tag Image File Format) is a widely used file format for exchanging bitmapped images (usually scans) between applications. Black and white line art or grayscale images should be saved as TIFF files.
- All grayscale artwork must be saved at the size of the finished document at a minimum of 300 dpi—black and white line art at a minimum of 1200 dpi.
- Please submit TIFF files as a layered document, in case last minute modifications are required.
- Always provide a list of fonts used within a document. This allows output technicians to download the appropriate fonts to their image setter or output device. Remember to list all fonts used with imported illustrations, or the output device may substitute a different font.
- When supplying PostScript fonts with a job, be sure to supply the printer fonts (also called outline fonts) and screen fonts (bitmap fonts). Both must be available for proper output.
- When supplying fonts, be sure to supply those used in the creation of EPS files. (They will not show up in your page makeup application on the list of fonts used.)
- We do not accept TrueType based fonts. Convert to outlines.
- Specify fonts and their style (bold or italic, for example) by using the long menus in your publishing program rather than selecting bold or italic by clicking on a style bar. The menu selection will give you a more accurate representation of the font and style desired. On the Mac platform, clicking on the style bar allows you to select styles for which fonts don't actually exist.
- Limit the number of fonts used in each job.
- Avoid using fine serif fonts. These fonts are usually too thin and fill in or lose detail in the printing process.
- Avoid saving EPS files within EPS files. Avoid transparencies and Illustrator filters to create shadows they convert to low resolution files.

We support the **sm@rt** program to improve artwork readability. We accept artwork prepared by these standards. Please visit the website www.smart-artwork.com for more information.

ARTWORK STORAGE

Artwork will remain on file for 1 year. You must resubmit art after that time.

MISCELLANEOUS

Flat magnets are measured by multiplying the maximum length by the maximum width to determine square inches involved.

OUR MAGNETS ARE ECO-FRIENDLY

70% RECYCLED MAGNET

Magnets, by weight, are 70% strontium ferrite. This material is a by-product of iron oxide created during the steel making process and therefore, recycled material.

10% RECYCLED SUBSTRATE

In addition to the magnet's recycled content, we use a printable substrate made from 10% post consumer recycled material.

This combination is used on **all 20 mil 4 color process magnets in this catalog!**

*CALIFORNIA PROPOSITION 65 WARNING

Proposition 65 is a California law that has been in effect since 1986 to promote clean drinking water and keep toxic substances that cause cancer and birth defects out of consumer products. Proposition 65's formal title is "The Safe Drinking Water and Toxic Enforcement Act of 1986." It is administered by Cal/EPA's Office of Environmental Health Hazard Assessment (OEHHA).

The law requires that anyone at reasonable risk of exposure be informed when substances classified as toxins are present. Since enactment, it has been the reason for the addition of notices of specific contents to consumer product labels. Along with the added label requirements, an official list of implicated substances is maintained and made publicly available. To date there are over 700 chemicals listed, and entries are added or removed based on current scientific information. All substances listed show their known or suspected risk factors, a unique CAS chemical classification number, the date they were listed, and if so, whether they have been delisted.

The Magnet Group is committed to complying with all aspects of Prop 65. For further information please feel free to contact TMG at 1-800-458-9457.
